

Managing Departments & Project Assistants

A step-by-step guide for EMS administrators: creating a department, configuring geo-fencing and holidays, and inviting Project Assistants (PAs) to a department.

Contents

1. Before you start — signing in as Admin
2. Part A — Adding a Department
 - Step 1: Basic Info
 - Step 2: Geo-fence (check-in / check-out locations)
 - Step 3: Holiday Calendar (optional CSV)
 - Step 4: Review & Create
3. Part B — Schedule settings (applies to every department)
 - Working days, shift hours, lunch break, late grace
 - Booking rules: slot length, limits, window, cutoff
 - Work types
4. Part C — Adding a Project Assistant (PA)
 - Inviting a PA from the Users tab
 - What happens after the invite is sent
5. Quick reference & troubleshooting

Roles at a glance

Role	How they get an account	Tied to a department?
Admin	Pre-provisioned. Full access to every screen in this guide.	No (organization-wide)
Project Assistant (PA)	Invited by an Admin from the Users tab — this guide covers it.	Yes — exactly one
Faculty	Created automatically on their first Kerberos login. <i>Not</i> invited manually.	Yes (from Kerberos domain)
Moderator	Invited by an Admin from User Management.	No (organization-wide)

Access details

Portal URL	http://fsmiitd.in:5005/
Login page	http://fsmiitd.in:5005/login
Admin email	<code>admin@iitd.ac.in</code>
Admin password	<code>Sanjeev08@</code>

Keep this page confidential

These credentials give full administrative access. Do not forward this document outside the admin team, and change the password from the Settings page after first login.

1. Before you start — signing in as Admin

1 Open the login page

Go to <http://fsmiitd.in:5005/login> . Enter your admin **email or employee code** and **password**, then click **Login** .

Do not use “Continue with Kerberos” — that is for Faculty only.

Figure 1 — The login page. Admins use the standard email / employee-code form.

2 You land on the Admin Dashboard

The left sidebar is your main navigation. Everything in this guide lives under **Departments** and **Users**.

Figure 2 — Admin dashboard with the sidebar: Dashboard, Departments, Users, Attendance, Bookings, PA Unavailability, System Logs, Settings.

2. Part A — Adding a Department

A department groups Project Assistants and Faculty together, holds its own office locations for attendance geo-fencing, and has its own holiday calendar.

1 Open the Departments page

Click **Departments** in the sidebar. Existing departments appear as cards with their staff count. Click **+ New Department** in the top-right corner.

Figure 3 — Departments page. “Schedule settings” (working hours) is shared by all departments; “New Department” opens the creation wizard.

2 Step 1 of 4 — Basic Info

Fill in the **Department name** (required) and an optional **Description**. You can also upload a **logo** (PNG, JPG or WEBP, max 2 MB) — this can be added later too. Click **Continue**.

Figure 4 — Basic Info step with a name and description filled in. The department name is the only mandatory field in the whole wizard.

3

Step 2 of 4 — Geo-fence

Decide whether PAs must be physically at an office location to punch attendance.

- **Enforce geo-fencing OFF** (default) — staff can check in / out from anywhere, no location prompt.
- **Enforce geo-fencing ON** — staff must share their location and be inside one of the pinned locations.

Click **+ Add location** for each office. Enter a **Location name**, **Latitude**, **Longitude** and **Radius (m)**. You can add several locations; a PA may punch from any of them. Click **Continue**.

The screenshot shows the 'New Department' wizard at the 'Geo-fence' step. The 'Enforce geo-fencing' toggle is turned on. Below it, a list shows one location: 'Main Building' with coordinates 28.5450, 77.1926 and a radius of 150m. A '+ Add location' button is at the bottom. Navigation buttons 'Back' and 'Continue' are at the very bottom.

Figure 5 — Geo-fence step with enforcement switched on and one location ("Main Building", radius 150 m) added.

Tip — finding coordinates

Right-click the building in Google Maps and copy the two numbers shown (latitude first). A radius of 100–200 m covers a typical building and allows for GPS drift.

If enforcement is ON but no location is added

the wizard shows a warning — PAs would not be able to punch in anywhere. Add at least one location or turn enforcement off.

4 Step 3 of 4 — Holiday Calendar (optional)

Upload a CSV of holidays for this department, or skip and add them later from the department page (**Holidays** tab). Each parsed row shows a validity check; remove bad rows with the ✕ icon. Click **Continue**.

Figure 6 — Holiday Calendar step. Skipping is fine; holidays can be managed after creation.

5 Step 4 of 4 — Review & Create

Check the summary. Use **Back** to change anything. Click **Create** to save the department. The dialog closes and the new department card appears in the list.

Figure 7 — Review step summarising name, description, geo-fence settings, locations and holidays before creation.

Done

The department now exists. Go to the **Users** tab to invite Project Assistants into it (Part C).

2

Working hours & attendance

Setting	What it does
Working days	Click the day chips to toggle. Non-working days have no bookable slots and no attendance expectation.
Shift start / Shift end	The daily window. Booking slots are generated between these times; the start time is the reference for lateness.
Lunch break (optional)	Slots inside this break are not bookable. Use Clear to remove it.
Late grace window	2 / 5 / 10 / 30 minutes. A PA who checks in within this window after shift start is <i>not</i> marked late.

3

Booking rules

Setting	What it does
Allow PA bookings	Master switch. When off, Faculty can still see PAs but cannot create new bookings — useful during exams or shutdowns.
Booking slot duration	15 min / 30 min / 1 hr / 2 hrs. Length of one slot on the booking calendar; Faculty pick consecutive slots for longer work.
Slots per booking	Cap on consecutive slots in one booking. 0 = unlimited. The hint below the field shows the resulting maximum duration.
Faculty PA booking limit	How many bookings a single Faculty member may have active at once. 0 = unlimited.
Booking window	How many days ahead Faculty can book (1–90). Today counts as day 1.
Cancellation / reschedule cutoff	Minutes before a booking's start after which it can no longer be cancelled or moved. 0 = changes allowed right up to the start.

4

Work types

The list Faculty choose from when booking a PA (e.g. Data Entry, Lab Assistance). Type a name and click ; use the pencil to rename and the bin to remove. Work-type changes apply **immediately** — they are saved as you go and don't need the Save button. Existing bookings keep their original type, and at least one work type must remain.

Schedule settings [X]

Working hours, slot length, booking limits and work types. These apply to every department.

Faculty PA booking limit

Max PA bookings a faculty member can have active at once. 0 = unlimited.

Booking window

days ahead

How far in advance faculty can book a PA — today counts as day 1.

Cancellation / reschedule cutoff

minutes before start

A booking can only be cancelled or rescheduled until 30 min before its start time.

Work types

What faculty choose from when booking a PA. Changes apply immediately; bookings already made keep their original type.

☐ Data Entry		edit	delete
☐ Lab Assistance		edit	delete
☐ Field Work		edit	delete
☐ Documentation		edit	delete
☐ Research Support		edit	delete
☐ Other		edit	delete

Figure 9 — Lower half of the dialog: booking limits, window, cutoff and the Work types list.

5

Save

Click **Save for all departments**. A toast confirms “Schedule settings saved for all departments”. Changes take effect for new bookings and for attendance from the next check-in.

Changing slot duration or hours later

Bookings that already exist are not moved or deleted; only new bookings use the new grid. Announce changes to Faculty before saving to avoid confusion.

4. Part C — Adding a Project Assistant (PA)

PAs are **invited** from the **Users** tab: you choose the department, enter their name and email, EMS emails them a secure link, and they set their own password. A PA always belongs to exactly one department, so create the department first (Part A).

1 Open User Management

Click **Users** in the sidebar. This page lists every non-admin user across all departments, with counts such as **Pending Invites** — people who have been invited but have not yet set a password. Click **+ Invite User** in the top-right corner.

User Management
Invite, edit, and manage users across departments

13 Total Users **13** Active **0** Inactive **6** Faculty **0** Pending Invites

Showing 1-8 of 13 1 2 >

Figure 10 — User Management. The “Invite User” button is at the top-right.

2

Fill in the Invite User dialog

Leave **Role** on **Project Assistant** (the default). The same dialog is used for Moderators — change the role and the Department field disappears, since Moderators are organisation-wide.

Field	Notes
Role	Project Assistant.
Department (required)	The department the PA will work in. Faculty of that department will see them for bookings.
Name	Full name as it should appear across EMS.
Email (required)	The invite is sent here and becomes their login ID. Must not already exist in EMS.
Phone Number (optional)	10-digit mobile.
Photo (optional)	PNG / JPG / WEBP, up to 2 MB. The PA can change it later.

Click **Send Invite**. A toast confirms “Invite email sent to the user.”

Figure 11 — Invite dialog with role, department and details filled in, ready to send.

3

Confirm the PA appears

The new PA is listed on the Users page with status **Invited** until they accept. They also appear in their department's **Staff Members** table (Departments → **Manage**), where you can toggle **Active** to deactivate/reactivate the account or use the pencil icon to edit name, phone or photo.

Figure 12 — The department's Staff Members table: role, joining date, active toggle and edit action. Filter by role / month / year, or Export.

Note

The department page is for *viewing and managing* existing members — new PAs are always invited from the Users tab.

What happens after the invite is sent

1

Invite email

EMS emails the PA a link of the form `/login?invite=...`. The link is valid for **7 days**.

2

PA sets a password

Opening the link shows a “set your password” form. Once saved, the account moves from **Invited** to **Accepted**.

3

PA logs in

They sign in with their **email** and the password they chose, and land on the Project Assistant dashboard.

4

Ready to be booked

The PA now appears to Faculty in their department for bookings, and can punch attendance and apply for leave.

5. Quick reference & troubleshooting

Resending an invite

Email not delivered, or link expired?

On the **Users** page, every user still marked **Invited** has a **Resend** button next to the badge. Click it to send a fresh invite email with a new 7-day link (the old link stops working). Each resend is recorded in System Logs.

Member	Department	Role	Invite	Joined	Active	Edit
 Resend Test PA resend.test@emsv2.local	Demo	PROJECT ASSISTANT	Invited Resend	Sep 14, 2026		

Figure 13 — The Resend button appears only while a user's invite is pending.

Common issues

Symptom	Cause / fix
"Department name is required"	Step 1 of the wizard needs a name before Continue works.
"A user with this email already exists"	Every email is unique across EMS. Search for it on the Users page — the person may already be in another department.
"Logo must be under 2MB" / "must be an image file"	Resize or convert the image to PNG / JPG / WEBP.
PA never received the email	Ask them to check spam, then click Resend next to their "Invited" badge on the Users page. If resend reports an error, SMTP is not configured correctly (Settings).
Invite link expired (older than 7 days)	Users page → Resend . A new link is issued; the old one is invalidated.
Warning on the Geo-fence step	Enforcement is ON with zero locations. Add a location or switch enforcement off.
Faculty can't be invited	By design — Faculty accounts are created on first Kerberos login; only PAs and Moderators are invited.
Need to change someone's role	Roles are fixed once the account exists. Deactivate and invite again with the correct role.

Where things live

Task	Path
Create / edit a department	Sidebar → Departments → New Department / card menu
Invite a PA or Moderator	Sidebar → Users → Invite User
Resend a pending invite	Sidebar → Users → Resend beside the "Invited" badge
View / edit / deactivate a department's members	Departments → Manage → Staff Members
Working hours / booking slots (all depts)	Departments → Schedule settings
Department holidays	Departments → Manage → Holidays tab
Audit trail of who created what	Sidebar → System Logs
